## WORD FORMATION

### Use of English Exam PART 3

#### Part 3: word formation

In this part of the exam you need to complete the text by using the root form (basic form) of the word. You need to conjugate the word by adding its prefix or suffix to make sure that it fits into the text and that it makes sense. The idea is to look around the gap and to think of the word class (noun, verb, and adverb, adjective), decide if it is affirmative or negative and then later think of the grammar. If it is a verb, which tense? If it is a noun, is it singular or plural?

#### STEPS TO SUCCESS:

1. Know what type of word you are provided with (if it is a verb, noun, adjective or adverb)
2. Know how to adapt the word and change its word type
3. Recognise if it is affirmative or negative from the context
4. If it is a noun, know when you need a singular or plural form

The best way to improve this part of the exam is to create word lists (see word lists below) and review the different forms of each word. These are the high frequency words from the Advanced Exam. Secondly, you must read a lot. This will help you to recognise word patterns and collocations that indicate the type of word you will need.

### Childhood Obesity

Since \_\_\_\_\_ records began in the early 1970's, \_\_\_\_\_ obesity has more than tripled in the USA to a ridiculous rate. Obesity is measure according to a person's Body Mass Index (BMI), taking into account age, height and bone structure. The BMI percentile has been used widely worldwide to calculate the rates of childhood obesity for \_\_\_\_\_ 1-20 as the factor of growth is an \_\_\_\_\_ issue to consider in what is an exhausting process of evaluation. The reason that childhood obesity is so high on the agenda's of many government programmes is due to the health costs that can come about in a system that is \_\_\_\_\_ drained of fund, as a result of it. For those with childhood obesity are far more at risk of contracting a chronic \_\_\_\_\_ such as asthma, type two diabetes or sleep apnea. Long term childhood obesity has repeatedly been proven to lead to becoming morbidly obese in later life. What is really important is to seek to prevent this condition from developing in the first place. Governments need to implement educational programmes and look to change \_\_\_\_\_ harmful lifestyles from starting out in the first place, only this way will there be a long-term \_\_\_\_\_ to this ongoing problem.

### Teaching Online

The teaching and learning of languages has been \_\_\_\_\_ in recent years thanks to the internet. Some might say that the quality of teaching may not be what it once was but i would argue that the benefits out way the \_\_\_\_\_. This is an opinion \_\_\_\_\_ by many such as omniglot.com and english.com. The internet offers us a vast amount of resources that were once often difficult to get hold of or very \_\_\_\_\_. I would argue that for this reason it is almost impossible to be involved in the teaching and learning of languages without working online in some shape or form.

To learn a language, the student is required to be \_\_\_\_\_ and varied in their methods. The days of grammar book based learning are long gone and the internet gives teachers and students the perfect opportunity to practice language, discuss their doubts and even find \_\_\_\_\_ people with whom they can practice speaking. It could be called 'the classroom \_\_\_\_\_ walls, but what it has done is opened the lid of time restraints. We can now study languages 24/7 and this \_\_\_\_\_ those with tight schedules to get into language learning. We can study where we want, when we want and even use our telephones to do so.

### Social Media

The dangerous nature of social media has been \_\_\_\_\_ no end of times. The principles of it are good and we can see how it is useful, but sometimes a good idea can turn into something bad. The concept of \_\_\_\_\_ likeminded people to share their interests at an \_\_\_\_\_ price for everyone is fascinating; however, from this a monster has evolved through the exploitation of it and its overuse. If you think about it, how often do companies hire people based on what they have seen about them on social media instead of looking at the CV? How many people have lost their jobs due to something that was posted on either Facebook or twitter? The lack of privacy in our fast paced cyber-world is quite \_\_\_\_\_ worrying and we need to look for an \_\_\_\_\_. Even those who are not directly linked to you (on your friends list etc.) can observe your \_\_\_\_\_ and see what you are posting on the walls of others, what you need to keep in mind is that everything you put online stays there forever, no matter how hard you try to delete it, it can always be \_\_\_\_\_ and traced back to its origin. This has been observed with various examples amongst public officials and celebrities who have had to ask for forgiveness or \_\_\_\_\_ change their policies because of things they have said, even years after these occurrences. The illusion of privacy has been lifted and we need to take note. Be careful with what you post online!

## UNIT 4

### Divorce

In spite of it being a \_\_\_\_\_ catholic country, Spain actually has the highest divorce rate in Europe. Surprised? Well, when you take a look at the social and economic factors, it is not all that weird. \_\_\_\_\_ the Franco dictatorship, divorce was almost impossible; this resulted in what is known as 'A Spanish Divorce', in which couple \_\_\_\_\_ married, but resided in different places, often with new concubines. Since the 'Express Divorce Law' passed in 2005, Spaniards have put into effect this new found \_\_\_\_\_.

What is more, people need to consider the economical factors. Since we have just gone through a dire financial \_\_\_\_\_, many couples have struggled greatly to make ends meet and this of course has caused friction and many have not had the endurance to \_\_\_\_\_ such a tough task. That combined with the carelessness of some young people on deciding to get married, the \_\_\_\_\_ of youngsters to fly the nest and the influence of sexual liberation, more than 3 in every 4 marriages in Spain end up in divorce. This is an \_\_\_\_\_ and quite frankly concerning figure that needs to be significantly lowered.

## UNIT 5

### So How Sore Should We Be After A Workout?

I believe that both the points of view that there is a \_\_\_\_\_ for an intense workout, but also the need for caution have very credible \_\_\_\_\_. For example, if you are training as a body builder and the goal of your workout is to put muscle on, then being sore after a workout tends to be a regular and necessary \_\_\_\_\_ due to the demanding nature of the activity. You will hear the expression "I trained my legs so hard on Monday I can barely walk today!", it is an expectation that all professionals have. For the sports person who is "in season", being sore is not very beneficial at all. Being sore will negatively affect \_\_\_\_\_ and performance so an \_\_\_\_\_ needs to be found.

So what about the everyday person who works, socialises regularly and fitness is maybe not the number one priority? Should they be sore after a workout or have a rigorous training regime? When they first start, I would say yes. It is almost \_\_\_\_\_ as the body needs to adapt and get used to the new demands placed on it. After let's say, two weeks of settling into a 2/3 day a week training routine the \_\_\_\_\_ will start to wear off. For the average Joe training in a sustainable way for life, I would lean towards training hard, but perhaps not to the point where they are sore for days afterwards. For these people, training "movements" rather than overloading individual muscle groups is far more efficient and effective. You may feel stiff a day or so after the session, but not to the point where you can't move. If we train so hard we are sore days after a session this can add to our stress. Exercise is a stressor after all and if we are highly stressed then training ourselves to the point where we feel \_\_\_\_\_ and wearing a straight jacket is not going to help. It can affect our sleep and overall recovery.
